

Veterinary Propedeutics – Exam Questions

Propedeutics Written – 12/7

1. Cow degree of vision
2. Subcutaneous injection – how to apply
3. Causes of silent peristalsis
4. Define overweight
5. List pain tests in cattle
6. Rabbit inguinal canal
7. Rabbit restraint
8. Liver primary panel
9. Polyuria – volume threshold
10. Head pressing – what kind of lesion?
11. Palpable lymph nodes in healthy horse
12. Palpable structures on left side in horse (rectal exam)
13. Gallop rhythm
14. Paradoxical breathing – cause
15. Size of subiliac lymph node in cattle
16. Which intercostal space for thoracocentesis?
17. Signs of small intestine disease
18. Left shift – definition
19. What is pollakiuria?
20. Contraindications for cystocentesis

Written Exam Questions

1. Subcutaneous medication – how to apply (disinfect, shave hair?)
2. Diarrhoea in small intestines – clinical signs
3. Degree of vision for cow
4. Subiliac lymph node size in cattle
5. Left shift – definition
6. Habitus – definition
7. Percussion – main sounds
8. Epigastrium organs in small animals (healthy/sick)
9. Polyuria – threshold number
10. Least frequent in dog/cat: polyuria, polydipsia, pollakiuria, incontinence
11. Perfusion-unstable patient – how to administer drugs
12. How to fixate a chinchilla
13. Which small mammals cannot synthesise vitamin C?
14. What is dysmetria?

15. Where to auscultate for peristalsis in horse
16. Liver biochemistry panel – primary parameters
17. Palpable lymph nodes in horse
18. Gallop rhythm – definition
19. Size of subiliac lymph node in cattle
20. Endocardial heart murmur – caused by?

July Exam

1. SI diarrhoea characteristics
2. Palpation location of kidneys in cats and dogs
3. Sedimentation and flotation time of rumen content
4. Pain tests in cattle
5. Primary skin lesions
6. Small superficial purulent skin lesions
7. Control of consciousness
8. Meaning of 30 mEq/L chloride concentration in rumen
9. Head pressing
10. Which tubes to mix and why
11. Medical term for enlarged lymph nodes
14. Kidney shape in small ruminants (bean-shaped, lobulated?)
15. Lactate assessment purpose
16. Species where dorsal skin can be used for handling
19. Most common cause of paradoxical breathing (pleural cavity)
20. Species requiring multiple subcutaneous injection sites

June Exam

1. SI diarrhoea characteristics
2. Palpation location of kidneys in cats and dogs
3. Sedimentation and flotation time of rumen content
4. Inguinal canal in rabbits
5. Primary skin lesions
6. Small superficial purulent skin lesions
7. What controls consciousness
8. Meaning of 30 mEq/L chloride concentration in rumen
9. Head pressing
10. Site of urea synthesis
11. Species requiring multiple subcutaneous injection sites
12. Mucous membrane colour in decompensated shock
13. Rectal palpation of kidneys in small ruminants

14. Kidney shape in small ruminants (bean-shaped, lobulated?)
15. What lactate measurement assesses
16. Handling of mice and gerbils
17. Palpable structures in a sick dog (mesenteric lymph nodes, ureter)
18. Non-marker for cholestasis (AST, GGT, bilirubin, ALT)
19. High-pitched respiratory sound: stridor
20. Cause of endocardial heart murmur

Written Exam – From Corrected Sheet

1. Characteristics of diarrhoea caused by diseases of the small intestine
2. Which organs can be palpated in the epigastrium in small animals (healthy/sick)?
3. Where is peristalsis routinely auscultated in horses?
4. We consider polyuria to be the excretion of urine: threshold value?
5. Which of the below occurs least frequently in dogs and cats: polyuria, polydipsia, pollakiuria, incontinence?
6. When administering subcutaneous medication, what is mandatory?
7. In patients who are perfusionally unstable, drugs should be applied exclusively by which route?
8. Main percussion sounds are?
9. Which parameters are considered primary panel for liver (multiple answers)?
10. Endocardial heart murmur develops due to?
11. Thoracocentesis – which intercostal space should be used?
12. Gallop rhythm is?
13. Left shifting is?
14. Which species cannot synthesise vitamin C?
15. During the chinchilla fixation procedure, it is always necessary to fix which part of the body?
16. Cattle have almost a vision of how many degrees?
17. What is the normal size of subiliac lymph nodes in cattle?
18. Which of the lymph nodes can be palpated in a healthy horse (multiple answers)?
19. Dysmetria is?
20. Habitus is – definition and what it includes
